RE: Clarification of Short Program Elements and Skate Canada's StarSkate Technical Package 2009-2010

1. Clarification of Short Program Elements
 - a. Ladies 1- as is
 - b. Ladies 2-The jumps in the jump combination should not be the same as the solo jump. Nor can the Axel be repeated. For example- if the solo jump is a double toe loop, the jump combination cannot include a double toe loop. It could include a single toe loop as a single and a double are different jumps.
 - c. Ladies 3- Same principle as Ladies 2- The jumps included in the jump combination should be different than the solo jump.
 - d. Ladies 4- Same principle as Ladies 2- However, if the solo jump is double flip, then the combination can be a double loop/double loop or a double toe/double toe.
2. Skate Canada's StarSkate Technical Package 2009-2010
 - a. As Stated in the AWG Technical Document, the criteria for the 2010 Games would be based on the StarSkate Technical Package as released for the 2009-2010 Season. It had been my hope that the changes would be minor and few. Unfortunately all of the free program requirements have changes to them. Thus as stated in the AWG Technical Package, these changes will be incorporated into the 2010 AWG. These changes are published in the Addenda A and will be available on the AWG website.
